Issue 6, December 2021

Over 1500 patients randomised!

## Milestones

- **1580** patients recruited as of 8 Dec 2021  
Congratulations to **John Radcliffe Hospital** for recruiting the study's **1500th patient!**
- We are now over three-quarters of the way to the overall recruitment target. Keep up the amazing work, everyone!
- 12-month follow-up began in September and is ongoing.
- Interim analysis: See for more details.

## Interim analysis

Thank you to all for your hard work entering data for the patients included in the interim analysis.

After last month's meeting, the Data Monitoring and Ethics Committee recommended that the trial continue. The DMEC members also congratulated the effort to catch up with our 'original' recruitment end target of end of January 2022, despite the difficulties posed by the Covid pandemic. We anticipate finishing recruitment in March 2022 based on current recruitment rates.

## Top recruiters

### By participants:

230	Great Ormond Street Hospital
168	Evelina London Children's Hospital
133	Southampton Children's Hospital
130	St Mary's Hospital, London

### Oxy-PICU Stars!

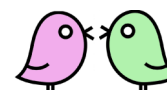

Our stars for this newsletter are:  
**Emily Foster, Katie Freer, Caitlin Oxford, Donna Austin, Natalie Chan, Amy Royal, Nicola Morgan, Verity Penner, Rob Dorey from Southampton.** Thanks for doing an amazing job supporting the study!

## Survival status/Follow-up

We continue sending out fortnightly emails asking for confirmation of patient survival status - we can only send questionnaires once status has been confirmed. Thank you for your prompt responses to these, as well as completing required data on MACRO and responding to DCRs.

## Identifiable data

A reminder that patient identifiable data such as DOB/NHS number/name shouldn't be included in any email correspondence with ICNARC. To share these details with us, please let us know in advance and we will advise on how best to do this.
