Issue 3, February 2017

## Roses are red, violets are blue, recruiting FiSh patients, it's up to you!

#### Love is in the air... and so is the end of recruitment!

The FiSh Study is due to finish recruitment at the end of March. Over the next two months, let's make sure we are hitting or exceeding our monthly target. We need you more than ever to recruit all eligible FiSh patients.

Thank you for all your dedication and support to FiSh - we couldn't have come this far without you!

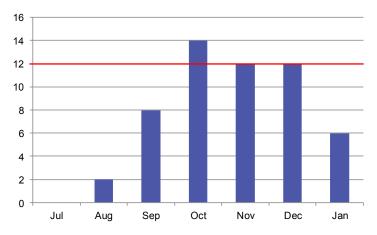

Lots of love the FiSh Study Team X

### **Fabulous February**

Hurrah! January is over and we have finally reached February. The graph below shows our recruitment so far. Recruitment in January was lower than previous months, so it is vital now more than ever that we reach our recruitment target of 12 (or more!) this month.

Let's make February a fab month for FiSh!

#### FiSh n' Tips

Provide a bleep/extension number near your randomisation envelopes available when needed

Posters, pocket cards, pens, flows and stickers are all great ways to visually promote and maintain awareness of FiSh

Display newsletters and your screening and recruitment reports to show everyone how FiSh is progressing at your site

📀 Eating garlic on a date is not a good idea! 🚄

#### **Regional HOTspots**

How are our three regions doing with recruitment?

The map below shows how many patients have been recruited in each region. As you can see, Bristol is leading the way, but London is hot on their heels! Southampton have London in their sights, but which region is going to recruit the most patients?

The next site teleconference will be held on: Tuesday 7 February, 11.30 - 12.30

Don't be late for your very important date!

Our next date will be held in early March.

#### Show us some love
