ProMISe Newsletter

Team ProMISe slides into double figures!

With under 100 patients to reach our target of 1,260 patients we are closing in on the finish line. Let's finish with a flurry and race to the bottom of the track.

1260

ProMISe will provide the highest quality of evidence to inform patient care. Whatever the outcome of the analysis, our trial will have important impact. **Many thanks to everyone for your hard work and dedication! Please keep it up as we enter this important phase of the trial.**

Regional League Table

We thought you'd like to see how you're doing against your local sites.

Site	No. of patients recruited
Leicester Royal Infirmary	31
Queen's Medical Centre	24
Peterborough City Hospital	22
University Hospital of North Staffordshire	21
Queen Elizabeth Hospital Birmingham	16

Congratulations to Leicester Royal Infirmary, who have recruited the highest number of patients! Can you leap frog one of your rivals…?

17th Annual Meeting of the Case Mix Programme

3 April 2014, London

UK Critical Care Research Forum

26 – 27 June 2014, Cardiff

Participant feedback

Currently, approximately **80%** of participants have completed and returned their follow-up questionnaires at 90 days and at one year. We have received some really positive feedback about the care received by participants in hospital – below are some we would like to share with you...

> Forever grateful, I wasn't expected to survive. The doctors and nurses were brilliant; you wouldn't have known they were on long shifts – they were just as pleasant and kind to me as they were from beginning to end of shift.

> Thank you for including me in this trial, as it most probably, along with the excellent care from all involved at the hospital, saved my life.

> ProMISe team at hospital were great. ProMISe doctor had time to discuss trial in a very busy environment. Very appreciated. Very glad to help/be a part!

> I'm really grateful for the care I received; I was treated so quickly and well. The research nurse was brilliant too.
