CMP Software Developers

There are two types of software products to choose from:

Commercial software developers

- Private company providing local data collection systems to critical care units for a profit.
- will usually provide a maintenance, support service and software updates as needed.
- are likely to have a regional or national coverage.
- are likely to use more up-to-date technologies and may provide additional functionality to enable the collection of other related data or a link to other hospital systems.

Non-commercial software developers

- Hospital/Trust/Network based individual/organisation providing local data collection solutions to local critical care units at cost/for free.
- may provide a maintenance and support service.
- may be limited to specific geographical area.
- may offer additional functions.

Advice for units

ICNARC recommends that when choosing the appropriate software units should:

- find out whether costs are annual or 'once-only' and if these cover support and maintenance;
- ask prospective software suppliers to demonstrate the software to unit staff (particularly the data collector);
- discuss the proposed software choice with the Trust IT department;
- ensure the software has passed ICNARC's rigorous compliance testing process; and
- ask other units who already use the proposed software solution how they find its use and application (where relevant).

A full list of CMP compliant and registered software developers and their contact details are provided overleaf.

CMP compliant software developers

CMP compliant software developers provide software that meets strict CMP dataset technical specifications and that have been deemed as 'CMP compliant'.

Commercial software developers

Software Developer	Software package	Lead contact	Contact details
AcuBase Ltd	AcuBase	Anne Beverley Company Secretary	Email: anne@acubase.org Web: http:www.acubase.org
Chameleon Information Management Services Limited	Infoflex	Marc Warburton Chief Executive	Email: cims@infoflex-cims.co.uk Web: https://www.civica.com Tel: 01923 896 939
Medical Associated Software House Limited	Medtrack	Tony Chang Systems & Customer Support Manager	Email: tonychang@medsoft.co.uk Tel: 01295 720 961
Mela Solutions Limited	MedICUs	Cristina Willans Medical Solutions Manager	Email: cristina.willans@mela.co.uk Web: https://mela.co.uk Tel: 01753 892 932 / 480 460
Philips	ICCA	Paul Hicks	Email: paul.hicks@philips.com Web: https://www.philips.co.uk/ICCA

Non-commercial software developers

Software Developer	Software package	Lead contact	Contact details
Barnet Hospital	ITUBASE	Tony Wolff	Email: tonywolff@47mvr.com Tel: 020 8216 5298
Derriford Hospital	Derriford Hospital	Susan Bracey Software Developer	Email: susanbracey@nhs.net Tel: 01752 437 000
Guy's & St Thomas's NHS Foundation Trust	Guy's & St Thomas's NHS Foundation Trust	Julian Hiscock Developer	Email: Julian.Hiscock@gstt.nhs.uk Tel: 020 7188 7188 ext. 82268
Royal United Hospital	Royal United Hospital	Andy Ballantine Senior Analyst/Developer	Email: andy.ballantine@nhs.net Tel: 01225 824 133
University College London Hospitals NHS Foundation Trust	University College London Hospitals NHS Foundation Trust	Jon Gillham Clinical Fellow	Tel: 020 3447 3390

CMP registered software developers (non-compliant)

Registered software developers have been granted access to the full complement of dataset specification documents required to develop CMP-compliant software, but have either:

- not yet submitted test data (i.e. non-active); or
- submitted test data, but are currently in testing phase.

ICNARC will **not** accept data submission from units using non-CMP compliant software unless submitted as a pre-agreed 'test file'.

CMP registered software developers (developing software)

- not yet submitted test data (i.e. non-active).

Software Developer	Software package	Lead contact	Contact details
Ascom UK Ltd	Digistat Critical Care	Ian Binks Strategic Partner Manager	Email: ian.binks@ascom.com Web: www.ascom.com Tel: 0121 353 6151
